In the published version, colours of the bars did not match with the legend of Figure 6. The legend on the figure, the figure caption and the text referring to this figure is correct.

Figure 6 with correct colours of the bars is inserted below:

**Fig. 6.** Functional groups of caddisfly larvae based on current preferences (Lib – limnobionts, Lip – limnophils, Lrp – limnorheophiles) in each reservoir (R1, R2, R3): A – percentage contribution of individuals, B – percentage contribution of taxa.
